

Backer Hard Rod

Product # D031001

DESCRIPTION

Insulates underside of sealant

Low-density Polyethylene Foam Standard Backer Rod (101) with a non-absorbent skin-like outer texture.

Compatibility: Standard Backer Rod is compatible with butyl, polysulfide, acrylic, polyurethane, silicone and most other cold-applied sealant compositions.

TECHNICAL SPECIFICATIONS

Product #	D031001
Product Type	Flange
Finish	Gray
Diameter	1/4 in
Length	4000 ft
Base	Polyolefin
Ideal Use	Aluminum Windows, Expansion Joints, Curtain-Window Wall Systems

APPLICATION

Basic Use: Standard Backer Rod is an ideal non-absorbant compressible backup material. It is inserted into a joint to control sealant depth to create a backstop to: - Allow proper sealant tooling - Allow proper sealant wetting of the joint surfaces - Insulate underside of sealant - Yield proper bond breaker between the Backer Rod and sealant. - It can also be used as a temporary joint seal.
